

# Nozzle Check Printer Test Page

Each row tests one ink channel. Lines should be continuous with no gaps.

## Cyan Channel

Solid reference strip — compare density to the lines above.

## Magenta Channel

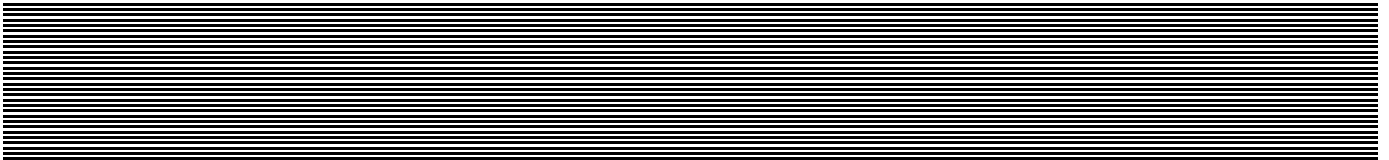

Solid reference strip — compare density to the lines above.

## Yellow Channel

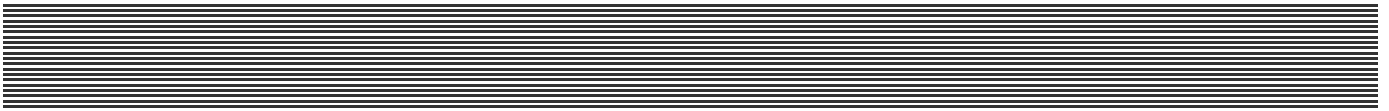

Solid reference strip — compare density to the lines above.

## Black Channel

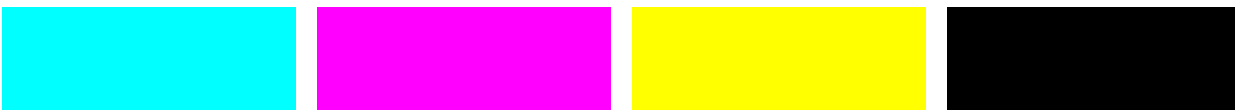

Solid reference strip — compare density to the lines above.

## Composite (All Channels)

Fires all nozzles simultaneously. Gaps here confirm issues found in individual channels.

## Channel Comparison Grid

Cyan

Magenta

Yellow

Black

Each block should be solid and even. Compare across channels to find weak nozzles.
